

This is what we will do

Baarn is green and peaceful, but not everyone benefits equally. Housing, healthcare, and climate are major challenges. GroenLinks Baarn wants a municipality where everyone can participate, feel at home, and look to the future with confidence. Below you can read our plans.

1. An affordable home in a pleasant and safe neighborhood
 - More social housing (at least 40%) and homes for middle-income households, including young people.
 - Converting vacant properties into sustainable homes; preserving diverse and green neighborhoods.
 - Support with relocation, elderly care, tenant protection, and assisted living.
2. We together 'We are in it together'
 - Accessible healthcare and quick help with debt / poverty support and mental health problems.
 - Support for young people, family caregivers, and volunteers.
 - Equal opportunities for children, active senior citizens, and fast integration of newcomers.
 - Tackling discrimination and exclusion — everyone should feel safe.
 - Investing in sports, culture, and education for everyone.
3. Working towards a green and healthy Baarn
 - Reinvigorating green spaces in neighborhoods, parks, and playgrounds; protecting and restoring nature.
 - Climate-neutral by 2035 at the latest, with attention to low-income households and local energy cooperatives.
 - Capturing rainwater, reducing heat stress, and promoting sustainable mobility.
 - Safer traffic, more pedestrianization and cycling, better public transport and fewer cars in the town center.

Our focus for the next four years:

- Addressing the housing shortage.
- Providing security and opportunities for people.
- Protecting nature.
- Preparing Baarn for the future.

Together we are building a social, healthy, and green Baarn!
